Problem with dashboard

I confront a problem with the instrument panel of aprilia strada 06 . The LCD screen slowly began to darken . Apparently the reason was the humidity and the sun. Do you have any idea ?

They all do that to some degree. Dobbi uses the "drill a hole " cure.

Yours looks so bad, I'd suggest a replacement dash. They come up on eBay occasionally.

That's because of the sun. Humidity has nothing to do with it. The "drill a hole" method might help with trapped water and misty glass, but won't help in this case as your polarizing film inside the LCD got burnt.
Theoretically you could replace the polarizing film with a new one but it's a pain in the ass procedure.

Better buy a new one as ytc1 suggested.

However, if you go down this route, make sure that the seller gives you the bypass pin code or you won't be able to pair it with your key.

Yes very good point. bypass code is factory set at 00000 I think (basically zeros) but if it has been set differently by an owner it will need to come with the dash otherwise you will be in Struggle Forest.

Good man!

perhaps put up a small how to guide because I'm sure someone else will need to do it

He felt that his whole life was some kind of dream and he sometimes wondered whose it was and whether they were enjoying it.

hello;
I have the same problem.

I have disassembled my dashbooard.

Posts: 2

I have access to the screen but i d'ont know how to desambler the screen and how to change the polarized filter thank you
king regards

Firstly you could use a razor blade to remove the polarized filter.
Look in this link.
https://www.youtube.com/watch?v=qC54ZKreEd4

The new filter must be adhesive.
good luck

Thanks for the link.
I think i have removed polarized film.
But some glue stick behind the screen.
My question is what kind of polarised film may i to stick behind the screen ?
Many polarised film is proposed see the link.

Hi, did you manage to solve the problem after all this time?
Thanks

@HolyCannoly. You need to buy a transflective film. Ordinary silver reflective film wont work.

Are you able to link the product on Amazon or such?

@HolyCannoly

Sorry late reply. Not on Amazon. I finally found it on Ali-Express. Just search for: Silver Polarizer Film For Monitor Matte Semi-Transflective

Hi guys, I'm stuck here: even opening the plastic fins the LCD won't move, seems like it's glued. Any suggestion?
